

### Enmotion Product Features and Benefits

- **Hygienic dispensing**
  - Touchless single sheet dispensing system
  - No contact between the user and the dispenser
  - User only touches the sheet used reducing risk of cross-contamination
  - Roll remains fully enclosed and protected in the dispenser
- **Improved cost controls**
  - Adjustable settings give flexibility to set each system according to the needs in your washroom
  - Three sheet length settings (20, 30 & 40cm) allow you to control consumption
  - Delay mechanism between sheets means more of each towel is used reducing waste
  - Electronic eye sensitivity can be reduced for dispensers that are sited in smaller washrooms
  - User must take the first sheet before the system will dispense another
  - Each dispenser is guaranteed 7 years
- **Improved user satisfaction**
  - Touchless system provides the user with a hygienic towel every time
  - Automatic roll transfer system means the dispenser need never run out
  - High quality paper towel is soft, absorbent and strong
  - Your customers have peace of mind in the knowledge there is no cross-contamination from previous users
- **Stylish image**
  - Modern design and innovative touchless technology means the system will help project a positive image to your washroom and ultimately to your business

## Improved system performance

### Attractive design

Gives a clean and modern image to any washroom

### Electronic sensor

User moves their hand in front of the sensor which activates the system to dispense a single, hygienic towel every time

Soft, absorbent towels

### Automatic roll transfer

Reduces maintenance time and means the system need never run out. No part rolls are thrown away

### Battery operated system

No need for costly mains connection. Automatic shutdown ensures longer battery life than other systems

### Adjustable dispenser settings

Allow you to adjust sheet length, time delay and sensor range to optimise the settings for each individual washroom

## Hassle-Free Maintenance

### Simple installation

The fixing panel has been designed to ensure the screw holes are located in the same position as many of those on existing dispensers ensuring changing your system is as simple as possible.

### Ease of servicing

A simple step by step diagram is indicated on the inside of each dispenser to ensure simple and easy maintenance of the rolls.

### Stub roll transfer

When the roll has dropped below the rim of the blue holder you simply drop the roll down in the dispenser and add a new roll. The top roll will then activate once the stub roll has run out, so the system need never run empty.

### Soft and absorbent

Excellent quality soft and absorbent towels to ensure a pleasurable hand drying experience.

### High traffic system

At 143m long, the roll will service even the busiest washrooms. You have the flexibility to determine how long each roll will last by selecting the sheet length:  
20cm length - 715 sheets  
30cm length - 476 sheets  
40cm length - 357 sheets
